DARE TO BE DIFFERENT!

Corporate Overview

Roxyglass is a leading Indonesian glass fabricator established in Jakarta in 1990. The company has a wide range of experience in glass for building and decorative products and draws its inspiration from the elegance and versatility of this beautiful material.

Employing an in-house design team of creative designers and experienced craftsmen, We have the ability to mass produce high quality glass in compliance with international product certifications such as (ANSI, BS, EN, JIS & ANZ) for local and export market.

We supply not only a comprehensive range of standard product, but also custom made-to-size product, both Ceramic printed and Insulated Glass. Our comprehensive and ever-expanding product range leads the field with an established reputation for technical excellence.

"Roxyglass" range is also under constant review, extends and improves by responding to the changing demands of the industry. The company's ability to react quickly and positively places it in a strong position to offer the highest product specification at the most competitive prices.

ACID & SIRIO

ACID & SIRIO glass is obtained by treating one of the surfaces of glass products with acid (etching) or painting techniques. This treatment changes the appearance of the glass, giving it a translucent and refined appearance. ACID & SIRIO glass coating creates a sophisticated look. ACID & SIRIO glass allows you to create a soft, intimate and elegant atmosphere when designing the decor of residential or professional areas.

BENDING GLASS

Utilizing the latest glass technology combined with over 20 years of bending experience, Roxyglass is a proud to present its line of Bend & Temp Glass. Roxyglass's curved tempered glass is manufactured with latest Advanced Bending and Tempering System. The glass produced meets International fracture standards while retaining excellent optical qualities. The shape is controlled by computer, which eliminates mould marks on the glass and provides accurate dimensional tolerances.

DOUBLED GLAZED

Approximately 50% of the temperature lost from a well insulated home with single glazing goes out through the windows. With double glazing, a layer of air is trapped between the two panes of glass to create an insulator that prevents approximately 51% of the temperature from escaping. Double glazing provides a sound buffer against exterior noises such as traffic and loud neighbours. By using double glazing and a combination of special glass type, the noise can be reduced by up to 50% of its previous level.

FACADE

As a building material, glass is highly versatile and can be processed in several ways; it can be toughened, bent, laminated or insulated. Using Roxyglass facades, it is possible to link interior space to exterior with minimum compromise.

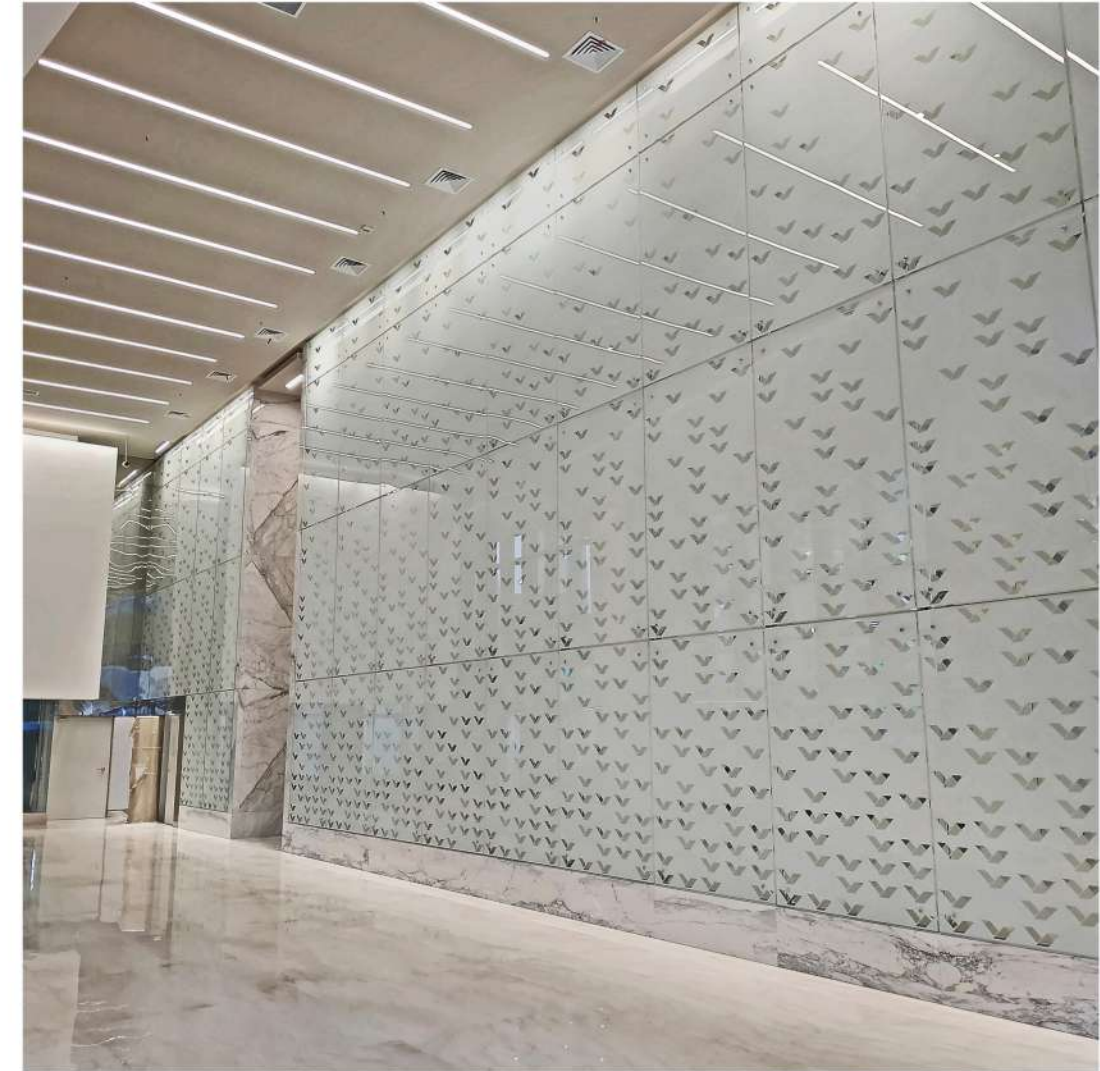

FANCY MIRROR

Mirror now able to change the look of the interior to bring the atmosphere of its own and make it more fascinating. Fancy mirror from roxyglass comes with a very impressive selection of patterns, or maybe you want to try to apply your own patterns, roxyglass will help to make it happen.

LAMINATED GLASS

Laminated glass is also a safety glass that is made by laminating 2 or more sheets of glass with one or more flexible interlayer called "E.V.A" and interlayer are bonded together by heat and pressure. When a piece of laminated glass breaks, the E.V.A holds fragments together. This also acts as a barrier against penetration as well as decoration.

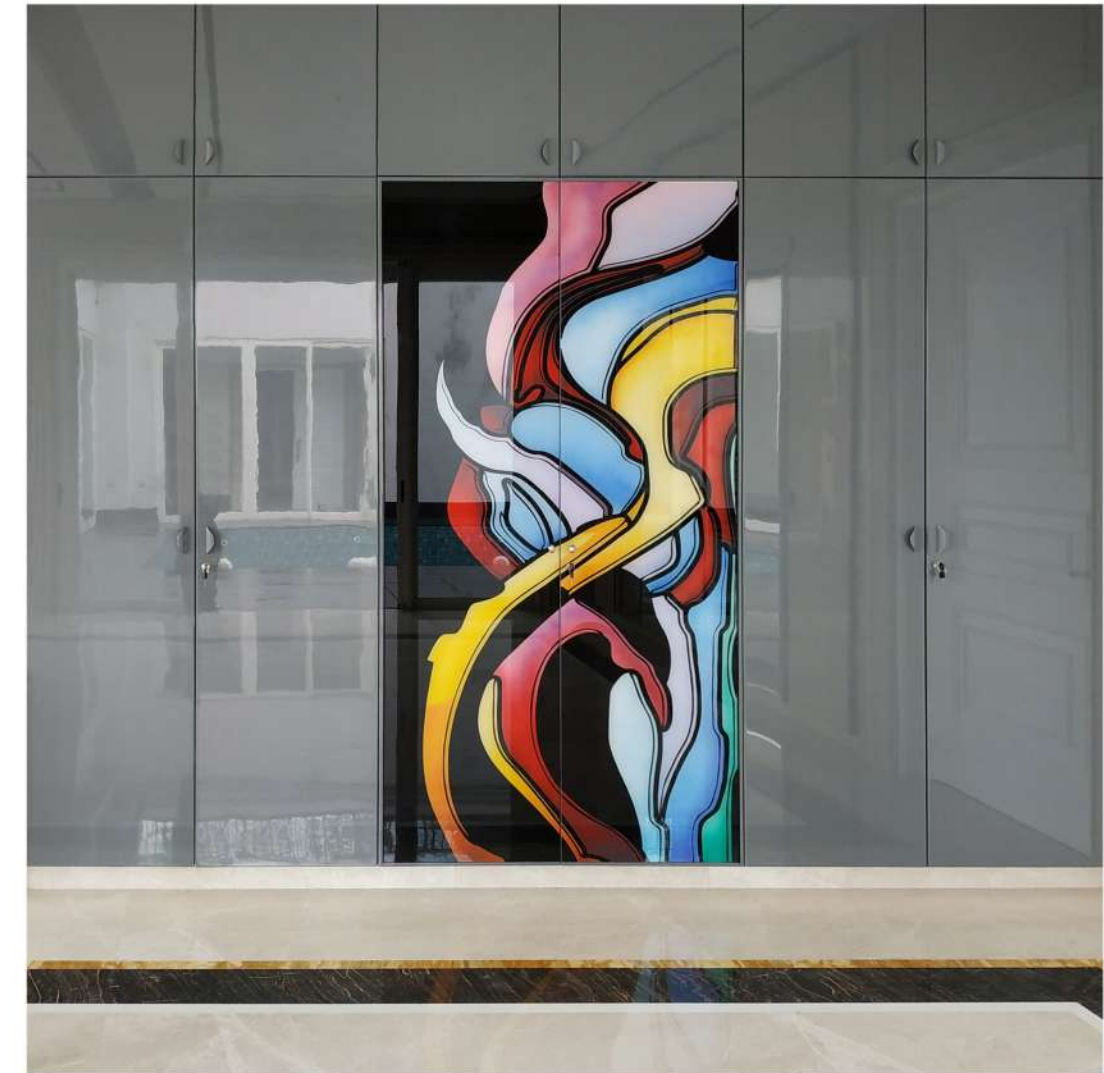

MIRROR

Mirrors can help you create a unique style for your interior open up a small space, and bring light into your hallways and entryways. Adding a mirror to your interior décor can help you create the right ambiance for each room. Evaluating the style of yours before purchasing a mirror will also help you find the right style, size, and shape of the mirror for your space.

NEURO GLASS

Neuro glass is a lacquered glass in which has an opaque and tinted appearance, through applying and firing a layer of high resistance lacquer on the reverse side of the glass.

SMART MIRROR

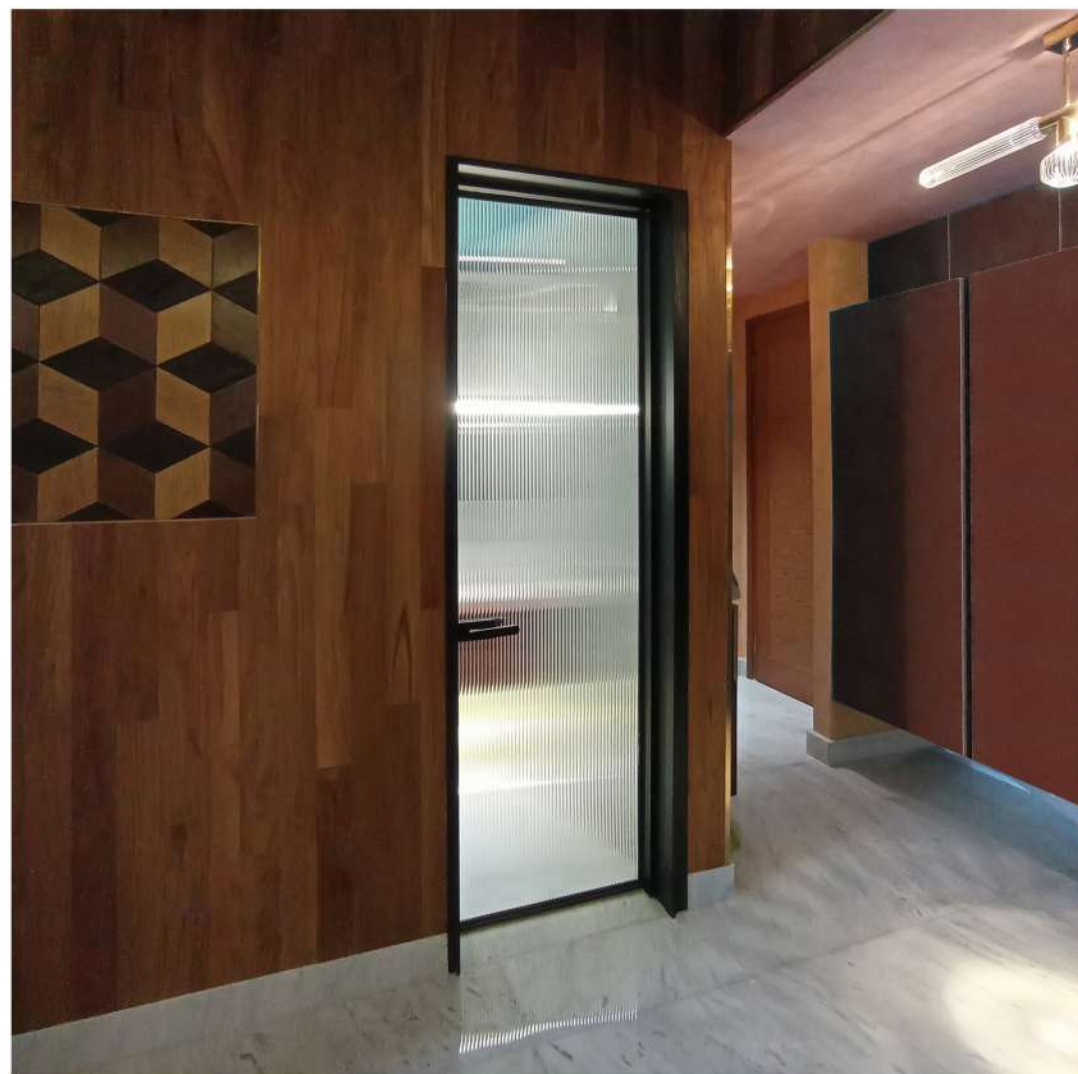

Known as glass specialist, each year We handle first class glass in array of colours and shape, We also process different kind of smart mirror. Due to the depth of Our experience, expertise and knowledge, down to the smallest detail, We match form and material judiciously; thus every piece produced is a masterpiece.

ALUMINIUM FRAME MIRROR

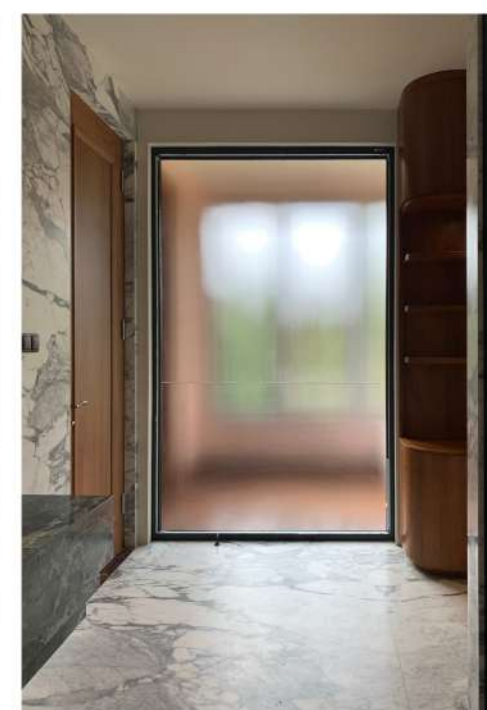

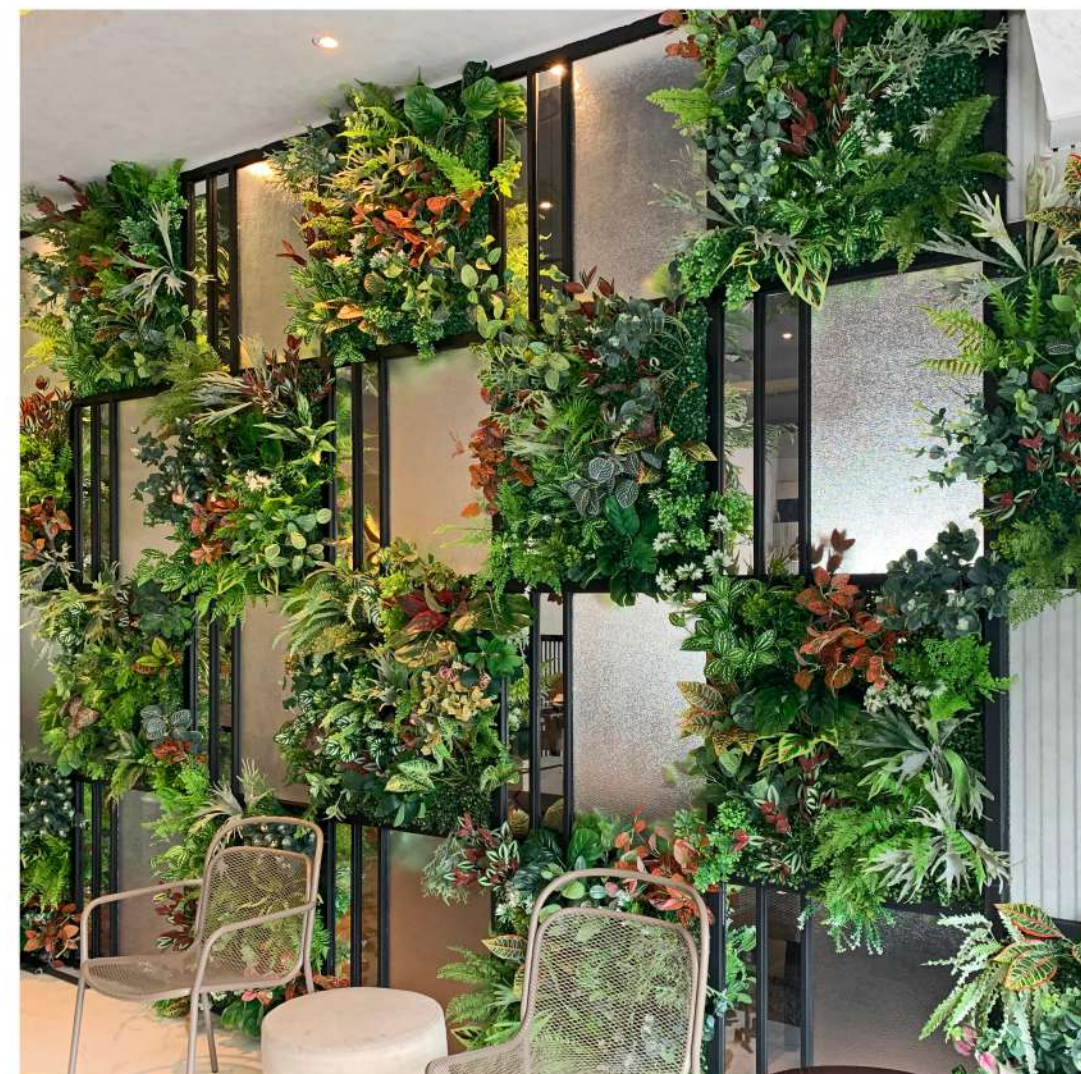

SLIMDOOR

PATTERN GLASS

Pattern Glass is a kind of decorative translucent glass with embossed patterns on one or both surfaces. Is generally used where privacy or obscurity is desired but light transmission is still important. With the special property of decoration, patterned glass can allow light to pass through, at the same time, it can also prevent clear view. Usually it transmits only slightly less light than clear glass.

SHOWER SYSTEM

The Modern trend in architecture is to create bathrooms that are a spacious sanctuary for relaxation. Yet this functional room needs to be practical too, and **Roxyglass** can achieve that for you.

CRYSTAL DIAMOND

Handcrafted elegance distinguished craftsmanship lasting beauty our premium collection is for those who want the best that life has to offer.

With the latest UV technology and traditional hand-made gluechip as well sparkling bevel cut diamonds with brilliant color and clarity give the feel of luxury and elegance.

STAINED GLASS

Art can be presented from a collection of pieces arranged to form an image. Made with high accuracy, roxyglass present stained glass that will create impressive atmosphere with a selection of classical design, modern, abstract or custom design to suit your taste.

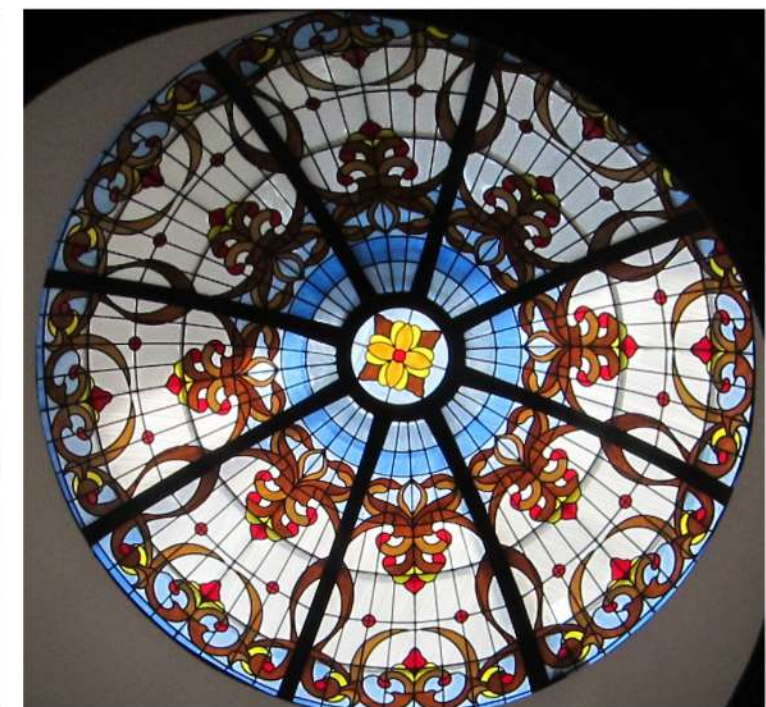

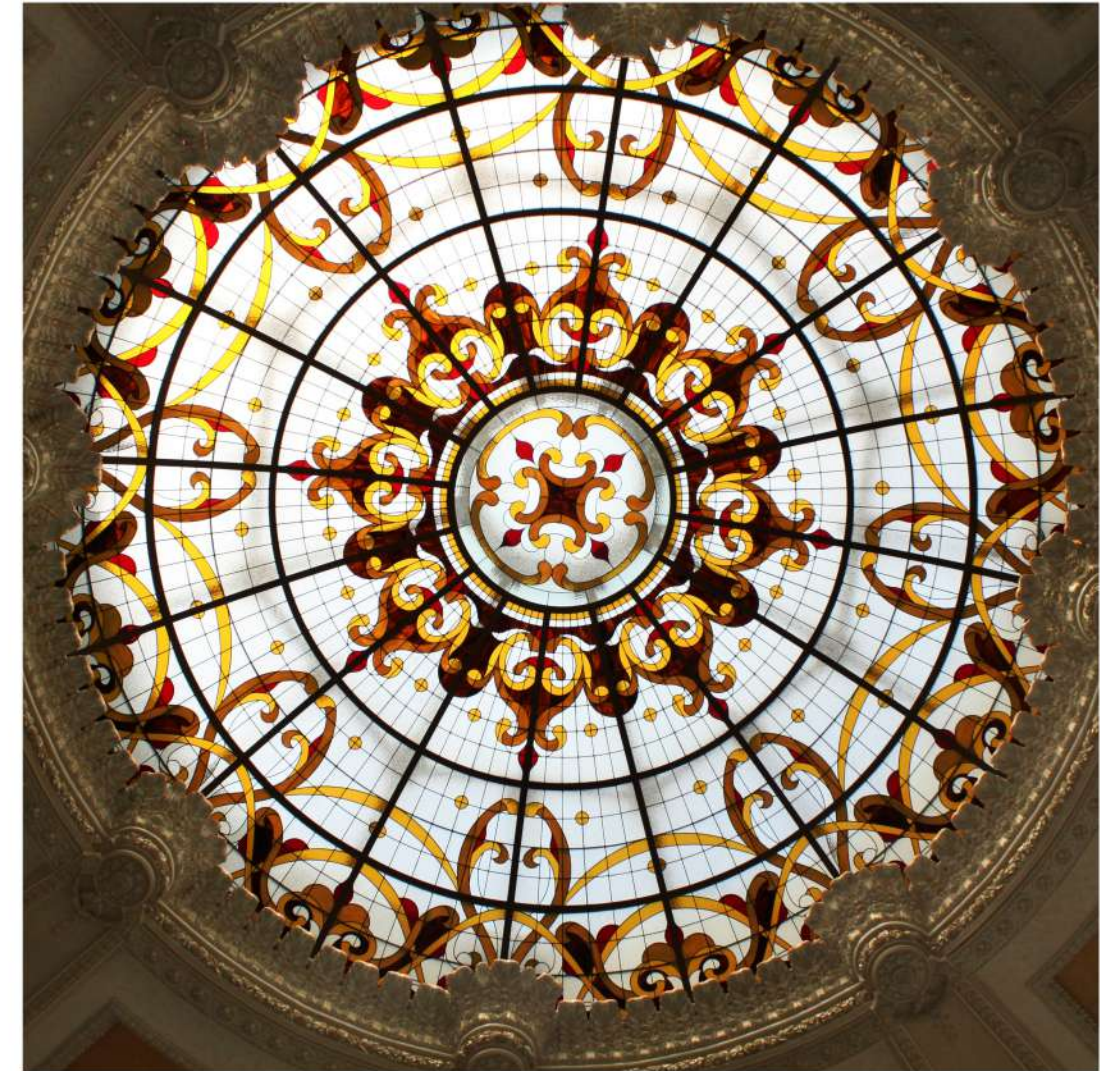

ANTIQUE MIRROR

Roxyglass Antique Mirror is a representation of an old world look with a modern flair. Using antique and standard mirror as a base we can conjure up old artisan techniques. We apply it to the back of the mirror and apply color to it to make it pop out on the front. Experience and technique, simulated by creativity and imagination have produced a wide range of possibilities and utilization of silvered flat glass.

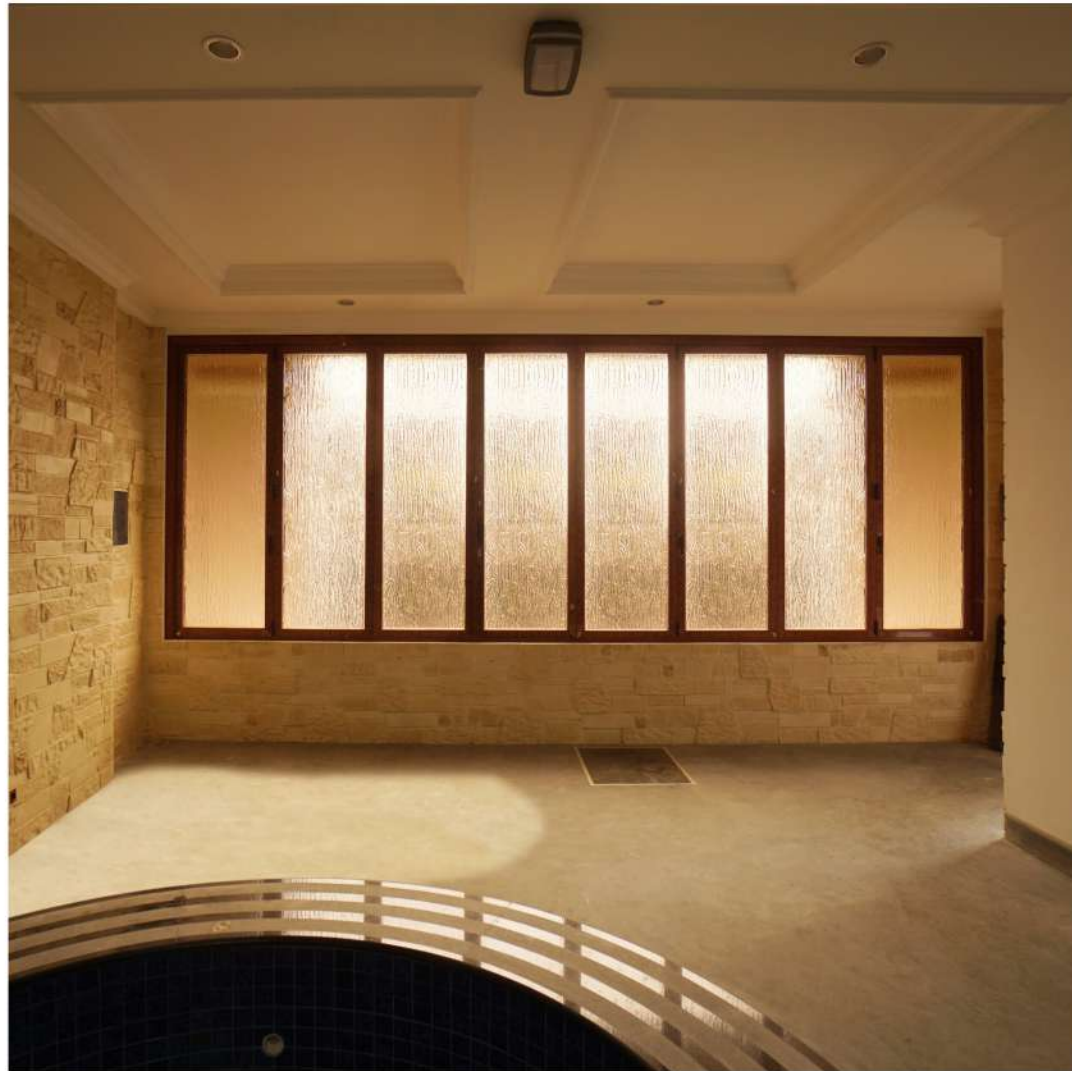

DOMES

Dome are comprised of two elements in essence; a steel frame that is configured into divisions or sections, and of course the beautiful stained glass panels. The glass panels are curved to give a true domed shape that is more pleasing to the eye and senses. There are magnificent architectural art glass elements that will light up the room and set the mood in a room.

FORMED GLASS

Roxyglass Antique Mirror is a representation of an old world look with a modern flair. Using antique and standard mirror as a base we can conjure up old artisan techniques. We apply it to the back of the mirror and apply color to it to make it pop out on the front. Experience and technique, simulated by creativity and imagination have produced a wide range of possibilities and utilization of silvered flat glass.

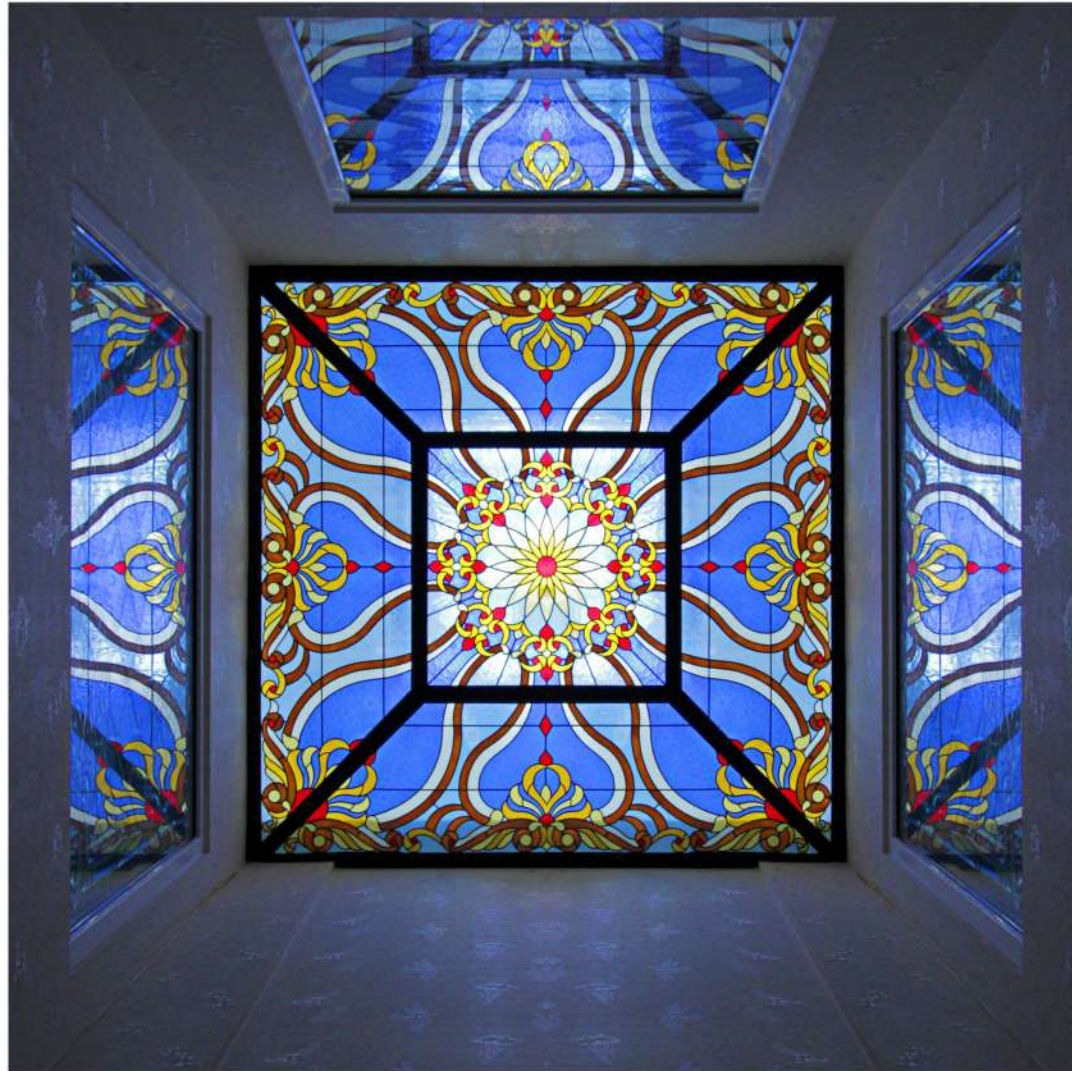

SIRIO BOX

Dome are comprised of two elements in essence; a steel frame that is configured into divisions or sections, and of course the beautiful stained glass panels. The glass panels are curved to give a true domed shape that is more pleasing to the eye and senses.
